Delivering logistics: better, smarter and more sustainably

Weastflows project final conference

Date: 12 February 2015

Time: 9.00am - 5.00pm

Location: Brussels, Belgium

The [Weastflows](#) (West and East flows) project has explored ways of improving freight logistics operations to help address the growing issues of traffic congestion, bottlenecks and available capacity across in North West Europe.

This closing conference will **explain the project's findings and results**, including work to help shift goods from road haulage to more sustainable modes, such as by rail, short sea shipping and river transportation. Leading authorities in the logistics field will also **discuss and debate the challenges and future opportunities** to achieve a more sustainable, efficient and innovative freight network in Europe.

To register your initial interest email tara.vernhes@instituteofsustainability.org.uk

Weastflows is an Interreg IVB North West Europe (NWE) project funded by the European Regional Development Fund (ERDF) that aims to encourage a shift towards greener freight transport in the NWE region.
